6220 Lakewood Blvd., Lakewood, CA 90712 (562) 804-2513 (714) 761-3166

Deciduous Fruit Trees

Almond

- **All-in-One** (*Semi-Dwarf*) - Medium to large fruit. Soft shelled with sweet good quality kernels. Its heavy production restricts growth so that some classify the tree as semi-dwarf to 15 ft. Self-fertile. #1 almond for home orchards. **Chilling hours: 500, Ripens: Late September/Early October**

Apple

- **Anna** (*Semi-Dwarf/EZ-Pick*) – Light greenish-yellow skin with slight red blush. Sweet, slightly tart, crisp, flavorful, creamy white flesh. Large fruit. Bears heavy crops. Good flavor fresh from the tree. Stores well. Produces at an early age. For better fruit production, and larger fruit size use a pollinizer, such as Dorsett Golden. **Chilling hours: 200-300, Ripens: Mid/Late June**
- **Dorsett Golden (a.k.a. Golden Dorsett)** (*Semi-Dwarf/EZ-Pick*) – Outstanding sweet apple for warm winter areas. Yellow skin with orange-red blush. Firm, smooth, crisp flesh with sweet-tart flavor. Very flavorful. Medium to large fruit. Does well in very mild winter areas. Good eating. It is a good pollinizer for Anna. Developed from Golden Delicious. Self-fertile. **Chilling hours: 100, Ripens: July**
- **Fuji** (*Semi-Dwarf/EZ-Pick*) – Reddish-green skin. Firm, very crisp, juicy, white flesh with excellent flavor. Medium fruit. A favorite eating apple. Excellent pollinizer for other apples. Self-fertile. **Chilling hours: 350-400, Ripens: September**
- **3-in-1 Espaliered Combo** – Anna x Dorsett Golden x Fuji -3 apple varieties grafted onto one tree and placed on 4 x 4 espalier trellis.
- **4-in-1 Combo** (*See Specialty Combos*)

Apricot

- **Blenheim (Royal)** (*Semi-Dwarf*) – Freestone, sweet, aromatic, and flavorful apricot. No. 1 apricot in California. Early bloomer. Self-fertile. **Chilling hours: 500, Ripens: Late June**
- **Flavor Giant** (*Standard*) – Extremely large, sweet, tart, flavorful fruit. Very heavy crop. Freestone. Self-fertile. **Chilling hours: 350-400, Ripens: Late May**
- **Gold Kist** (*Semi-Dwarf*) – Very heavy producer. Excellent sweet, tart flavor. Very good eating. Freestone. Self-fertile. **Chilling hours: 300, Ripens: Mid May**

Aprium (Apricot-Plum hybrid)

- **Flavor Delight** (*Semi-Dwarf*) – Sweet, bright yellow fruit. Resembles an apricot but with a distinctive flavor and texture all of its own. 2" in diameter. Bigger crops if pollinated by another apricot. **Chilling hours: 600, Ripens: Early June**

Cherry

- **Minnie Royal** (*Standard*) - Medium-sized red cherry. Firm with good flavor. Mainly used as a pollinizer for Royal Lee. **Chilling hours: 400-500, Ripens: Early May**
- **Royal Lee** (*Standard*) - Medium to large sized red cherry. Heart shaped. Very firm with excellent flavor. Pollinated by Minnie Royal. **Chilling hours: 400-500, Ripens: Late May**

Jujube - Shiny, reddish-brown, date like fruit. Sweet, apple flavor. Needs hot summers for fruit to ripen. It has an attractive silhouette producing clusters of yellow flowers. Nice decorative tree. A small tree can grow up to 10-15 ft. tall in about 15 years. **Chilling hours: 100. Ripens: Fall**

- **Contorted** (*Standard*) – Round-shaped. Reddish-brown when ripe, eaten firm and crunchy or room-dried to date-like chewy sweetness. Partly self-fruitful or pollinated by Lang. Branching structure is twisted and contorted.
- **Lang** (*Standard*) – Pear shaped, 1 ½ inches long fruit. Ripens later than Li. Better to fully ripen on tree to full mahogany color for best flavor. A more upright grower than Li.
- **Li** (*Standard*) – Round plump, 1 1/2" long. Shiny, reddish-brown, date-like fruit. Sweet apple flavor. Ripens earlier than Lang. It can be picked yellow-green & will finish ripening off the tree. Needs hot summer for fruit to ripen. Partly self-fertile, or pollinated by Lang.
- **Sherwood** (*Standard*) - Large shiny reddish brown date-like fruit. Sweet apple-like flavor. Trees may have fewer thorns than other Jujubes.

Mulberry

- **Persian Fruiting** (*Morus nigra*) (*Standard*) – Densely foliated tree to 25-30 ft. Large heart-shaped leaves. Fruit resembles blackberry. Juicy, dark red to black fruit, good for jam.

Nectaplum (Nectarine-Plum hybrid)

- **Spicezee (Semi-Dwarf)** - Combination of nectarine and plum. Slightly acidic and loaded with sugar to create a spicy sweet flavor. Also is a beautiful ornamental tree with dark red leaves in spring and tremendous blooms. Self-fertile. Chilling hours: 500, Ripens: July/August

Nectarine All are self-fertile.

- **Desert Delight (Semi-Dwarf)** – Large fruit with bright red skin and yellow flesh. Delicious, rich, nectarine flavor. Self-fertile. Chilling hours: 200 hours, Ripens: Mid June
- **Panamint (EZ-Pick)** – Rich red skin. Juicy, golden-yellow flesh. Aromatic & intensely flavored. Medium to large fruit. Freestone. Vigorous and productive. Chilling hours: 250, Ripens: Late July
- **Sauzee King White Saucer (Semi-Dwarf)** - First donut style nectarine! Early season variety has very sweet and juicy white flesh. Bears fruit at a young age and produces heavily. Thin regularly to produce bigger fruit size. Red skin over blush of yellow. Chilling hours: 500, Ripens: Unknown
- **Snow Queen (Semi-Dwarf)** – Sweet, juicy white fruit. Medium to large fruit. Ripens 2-3 weeks ahead of Babcock peach. Freestone. Chilling hours: 250-300 hours, Ripens: Late June
- **Dwarf Southernbelle** – Yellow skin with red blush and yellow flesh. Very large fruit. Very productive. Freestone. The tree height is 5 ft. tall. Chilling hours: 300, Ripens: Early August

Nectarine/Peach (Dwarf Combo)

- **Honey Babe/Necta Zee** – Grafted 2-n-1 dwarf nectarine/peach combo. Honey Babe: Sweet, yellow freestone, rich peach flavor. Grows to 5 ft. tall. Chilling hours: 500 hours, Ripens: Mid July Necta Zee: Sweet, yellow freestone, flavorful flesh. Grows to 6 ft. tall. Best self-fruitful miniature nectarine. Chilling hours: 500 hours, Ripens: Early July

Peach - All are self-fertile

- **August Pride (Semi-Dwarf)** – Large fruit with yellow skin and flesh. Sweet, aromatic, rich flavor. Freestone. Chilling hours: 275, Ripens: August
- **Babcock (EZ-Pick)** – Blushed red skin with little fuzz. Sweet, juicy white flesh. Very high scoring in taste tests. Medium, round fruit. Freestone. Heavy bearing. Chilling hours: 350-450, Ripens: Early July
- **Fei-Cheng Tao (EZ-Pick)** – Red cheeked skin. White flesh, similar to Babcock. Strong aroma, firm flesh. Freestone. Heavy bearer. Chilling hours: 450, Ripens: Early July
- **Giant Babcock (EZ-Pick)** – Red skin. White flesh with streaks of red. Sweet, aromatic and juicy. Very large fruit. Freestone. Very productive. Chilling hours: 500, Ripens: July
- **May Pride (Semi-Dwarf)** – Delicious, sweet, tangy flavor. Very large fruit. Large, showy pink blossoms. Chilling hours: 175 – 200, Ripens: May
- **Red Baron (EZ-Pick)** – Yellow skin and yellow flesh. Sweet and juicy flavor. Large fruit. Freestone. Large beautiful, double red blossoms cover the tree for several weeks in early spring. Chilling hours: 400, Ripens: August
- **Santa Barbara (EZ-Pick)** – Sweet, delicious flavor. Fine, melting texture. Large fruit. Yellow skin with red blush. Yellow flesh. Freestone. Chilling hours: 300, Ripens: Early to Mid July
- **Stark Saturn (Donut) (Semi-Dwarf)** – White-fleshed fruit resembles doughnut. Sweet, mild flavor, described by some as almond-like. Chilling hours: 4-500, Ripens: Late June/Early July
- **Dwarf Southern Flame** – Yellow skin with red blush. Firm, crisp, melting, yellow flesh. Good eating quality and aroma. Large fruit. Freestone. The tree height is 5 ft. tall. Chilling hours: 400, Ripens: Late July
- **5-in-1 Combo (See Specialty Combos)**

Asian Pear

- **Hosui (Standard)** – Brownish-orange russet skin. Juicy, sweet, flavorful, fine textured flesh. Crisp and refreshing like an apple. Medium to large fruit. Requires a pollinizer, such as 20th Century. Chilling hours: 450, Ripens: August
- **20th Century (Standard)** – Thin, yellow-green skin. Firm, juicy, cream-white flesh. Good for fresh eating and canning. Crisp and refreshing like an apple. Medium, round fruit. Heavy bearing. Self-fertile. Chilling hours: 400, Ripens: Late July to Mid August
- **4-in-1 Combo (See Specialty Combos)**

Pecan

- **Western Schley (Standard)** – Soft shell. Rich flavored nut. Heavy producer at an early age. Large tree. Excellent for Southern California deserts and higher altitudes. Semi self-fertile. Ripens: Early to Mid October

Persimmon –All are self-fertile

- **Coffecake™ (Standard)** – Flat-shape with orange skin and orange flesh flecked with brown. Unique spicy-sweet flavor. Flat-shaped and non-astringent. Chilling hours: 200, Ripens: Early to Mid Fall
- **Fuyu Imoto (Standard)** – Reddish brown skin. Large, round, flattened fruit. Smooth texture. Non-astringent. Chilling hours: 200, Ripens: November

- **Fuyu Jiro** (*Standard*) – Reddish orange skin. Large, round, flattened fruit. Good eating. Heavy producer. Non-astringent. **Chilling hours: 200, Ripens: November**
- **Giant Fuyu** (*Standard*) – Dark orange skin. Sweet and flavorful. Smooth texture. Very large, round to semi oblong fruit. Firm when ripe but softens quickly. Non-astringent. **Chilling hours: 200, Ripens: November**
- **Hachiya** (*Standard*) – Bright orange-red skin, covered with dark blotches. Sweet, rich excellent quality. Very large fruit. Oblong with a short point. Largest and best cooking quality. Astringent until soft ripe. Self-fertile. **Chilling hours: 200, Ripens: November**

Plum

- **Beauty** (*EZ-Pick*) – Red skin. Amber flesh tinged with red. Sweet and flavorful. Large fruit. Self-fertile. Good pollinizer. Strong, vigorous tree. **Chilling hours: 250, Ripens: Early – Mid June**
- **Burgundy** (*Semi-Dwarf*) – Maroon-colored skin and flesh. Sweet flavor with little or no tartness. Small pit. Very productive. Red Japanese plum. Narrow, upright habit. Self-fertile. **Chilling hours: 250-350, Ripens: Early July**
- **Green Gage** (*EZ-Pick*) – Round, medium, yellow green fruit. Firm, greenish-yellow flesh. Sweet, aromatic and a bit tart. **Chilling hours: 500, Ripens: Mid July**
- **Santa Rosa** (*Semi-Dwarf/EZ-Pick*) – Purplish-red skin. Firm flesh, yellow to dark red near skin. Large, oval fruit. Rich, tart flavor. Self-fertile. **Chilling hours: 400, Ripens: Mid June**
- **Satsuma** (*EZ-Pick*) – Large, nearly round fruit. Dark, solid red skin. Sweet, juicy, firm, dark red flesh to pit. Excellent for jam. Needs a pollinizer, such as Beauty or Santa Rosa. **Chilling hours: 300, Ripens: Late July to Early August**
- **4-in-1 Combo** (*See Specialty Combos*)

Pluot (Plum-Apricot hybrid)

- **Flavor Grenade** (*Semi-Dwarf*) – Elongated green fruit with a red blush. Crisp texture and explosive flavor. Taste test winner. Hangs on the tree for 4-6 weeks. Requires a pollinizer like Santa Rosa. **Chilling hours: 500-600, Ripens: August**
- **Flavor King** (*Semi-Dwarf*) – Reddish-purple skin. Sweet red flesh. Taste test winner. Remarkable, spicy bouquet and flavor. Naturally small tree. Requires a pollinizer like Santa Rosa. **Chilling hours: 500-600, Ripens: Mid August**
- **4-in-1 Combo** (*See Specialty Combos*)

Pomegranate

- **Angel Red** – Heavy yielding fruit. Extremely sweet and high juice content. Excellent for fresh eating with edible seeds that are soft enough to eat with the pulp. Ripens earlier than Wonderful. **Chilling hours: 150, Ripens: September**
- **Eversweet** – Very sweet, red-skinned, nearly skinless. The clear juice does not stain. Showy orange flowers. 8-10' arching shrub. **Chilling hours: 150, Ripens: August – October**
- **Grenada** – Large fruit. Resembles Wonderful with deeper red blossoms. Bears fruit regularly. Fruit is darker in color and less tart than Wonderful. **Chilling hours: 150, Ripens: August**

Pomegranate Tree (Single trunk)

- **Wonderful** - Extra large fruit. Blushed red skin. Red flesh. Juicy w/ a sharp flavor. Shrub or tree to 20 ft. tall. **Chilling hours 150, Ripens: September**

Specialty Combos

These trees are for mild climate areas like ours. Enjoy different flavors all on one tree. Get longer fruit production. Space saver.

Apple (4-in-1)

Dwarf Nectarine & Peach (2-in-1)

Peach (5-in-1)

Asian Pear (4-in-1)

Plum (4-in-1)

Pluot (3-in-1)

CHILLING HOURS refers to the number of hours, 45°F and under, during the dormancy period. These hours are cumulative and need not be continuous. All fruit and nut trees need a specific amount of chilling hours before they will produce fruit.

EZ-Pick is a pruning system started in the growing fields to create a fruit tree that is branched lower to make it EZ to pick fruit. These trees are not dwarfs. They have been pruned when young to keep low branching structure. It must be pruned each year in the summer & winter, to keep the size small.

Berries, Grapes, & Vegetables

Artichoke

- **Improved Green Globe** - Productive. Good flavor. Harvest in summer. Plant in fertile, well-drained soil. Protect from frost. Perennial.

Asparagus

- **U.C. 72** - Large, uniform stalks. High production, disease tolerant. Rust resistant & somewhat drought tolerant. Harvest in late spring to early summer. Plant in fertile, well-drained soil. Full sun.

Blackberry

- **Black Satin** - Thornless. Medium to large black berries. Honey sweet flavor. Bears fruit in summer. Semi-erect habit. Very disease resistant. Plant 2-4' apart in 6-9' rows. Needs well-drained soil.

Blueberry

—all blueberries require acidic, well-drained, humus rich soil.

- **Misty** - Small to medium sized berries. Bears a heavy crop earlier than all the rest (May) with a second small harvest in the fall. Care should be taken to not let Misty overbear. Yields best when planted with other blueberries.
- **O'Neal** - Large, firm fruit. Sweet & flavorful. 5-6' tall. Upright habit. Self-fertile. Ripens early summer.
- **Sunshine Blue** - Small berries with a good tangy flavor producing over an extended period. It easily overbears & should be heavily pruned & thinned or fruit will be very small. 3' tall. Ripens May-June.
- **South Moon** - Very large fruit with outstanding flavor. Ripens early summer.

Boysenberry

- **Thornless** - Large, non-shiny reddish-black colored berry. Soft, very juicy, sweet-tart flavor. Dark green foliage, dusty bloom with no thorns. Good for canning, freezing & eating fresh. Ripens in June.

Grapes (Table)

- **Canadice Seedless** - Red seedless grape. Very productive. Sweet, fruity, excellent flavor. Cane pruning. Ripens mid-August.
- **Concord 'Eastern'** - Blue-black, thick, tough skin grape. Excellent, strong flavor. Good for juice, jelly, and table use. Cane pruning. Ripens August-September.
- **Fantasy Seedless** - Blue-black skin with pale green flesh. Thin-skinned and firm. Large, seedless fruit. Excellent sweet flavor. Stores well. Cane pruning. Ripens in Early August.
- **Golden Muscat** - Golden-green skin. Large, seeded fruit. Sweet flavor. Table and wine grape. Cane pruning. Ripens August.
- **Interlaken Seedless** - Hybrid of Thompson seedless & American. Pale green, sweet, crisp berry. Cane pruning. Early harvest.
- **Kyoho** - Purplish-black grape. Very large fruit with few seeds. Sweet flavor. Cane pruning. Ripens September.
- **Thompson Seedless** - Greenish-white to golden skin. Medium, seedless fruit. Sweet flavor. Table and wine grape. Cane pruning. Ripens Early August.

Grapes (Wine)

- **Cabernet Sauvignon** - Late season red wine grape. Small, black, strongly flavored berry. Vigorous vine. Self-fruitful. Cane pruning. Ripens late September to October.
- **Chardonnay** - For white burgundy wines. Small round berry. Best quality where summers are cool. Vigorous vine. Self-fruitful. Cane pruning. Ripens late August to September.
- **Merlot** - Medium sized, round, bluish-black fruits. Used for distinctive red wines. Ages quicker than Cabernet Sauvignon. Spur or cane pruning. Ripens late September to October.
- **Pinot Noir** - Small black berries that yield the famous French Burgundy wines. Requires cool summers. Cane pruning. Early harvest.
- **Zinfandel** - For fruity red wines. Medium size, round, juicy, reddish-black berry. Spur pruning. Ripens August.

1. Cane Pruning-Varieties which develop fruiting wood away from the base of the cane, leaving long canes to train on wires or trellis. Tend to be excellent for arbors.
2. Spur Pruning-Varieties which develop fruiting wood close to the base of canes-prune back to within several buds to leave small spurs for development of new wood. Used mostly for wine grapes and a few table grapes.

Raspberry

- **Heritage** - Large red fruit. Very firm. Excellent quality. Everbearing. Vigorous canes. 5 - 6' long. Needs well-drained, slightly acid soil. In heavy clay soils plant in raised beds. Full sun.

Rhubarb

- **Cherry** - Deep red, heavy, thick stalks. Tart flavor. Excellent for pies, sauces & canning. Plant in well-drained soil with afternoon shade. Perennial.
